IFFCO ANIMAL NUTRITION

In a world with limited natural resources and Growing pressure in the feed-to-food value Chain, **IFFCO Animal Nutrition** works with customers to increase their **productivity and profitability** & to ensure that you get the best possible nutritional solutions through our Animal nutrition product range for your specific situation. We incorporate all local aspects and regulations in our and solutions & recommendations. Whether you are a **farmer, feed miller or integrator**, we offer solutions independently of the size of your company or what country or animal sector you operate in.

Mission:

Inspiring excellence in animal nutrition to provide sustainable nutritional solutions & farm services to promote food safety, health and happiness of people”

PRODUCT DEVELOPMENT

Standard Solutions: This area covers the standard Nutritional solutions , our standard premixes that support production efficiency based on the standard nutritional requirement followed across the industry, that precisely optimizes animal nutrition & ultimately helps you to increase your profitability & simplify your decisions.

Customized Nutritional Solutions: This area deals with an integrated approach based on local raw material availability , animal breed based nutritional requirements & sector you operate in. We serve you with our premixes regardless of the sector you are in. Whether you are in Poultry (layers and broilers), Cattle (dairy and beef), other livestock, in each sector we are the right business partner for you.

Feed Formulation Support: We don't just offer premixes, we offer a complete solution. With the development of our nutritional solutions we make optimal use of the raw materials already available locally at the farm. This method allows us to offer flexible feed recipes. We constantly monitor all activities. Results are extensively discussed to optimize. So we can help you move forward constantly. As your partner in business.

Things we do help our customers move forward

Technical Support:

- Feed & Premix formulation support by IAN Nutritionist
- On farm visit by IAN Experts

Farm Management

Guidance on animal diagnosis, rearing environmental control and biosecurity management are some of the areas covered. Technical support is offered by company specialists.

Analytical Support:

Broad variety of laboratory services that offer tools to improve the decision process when dealing with nutrition and ingredient selection. Advanced techniques are used, related to feed analysis, vitamin & mineral analysis in the accredited **ISO 17025: 2005 laboratory**.

Analysis done in house:

1. Vitamin & Mineral analysis (asis and in premixes)
2. Mycotoxin Profile
3. Proximate Analysis

Quality Control at Every Step

Certified Quality & Safety guarantees the consistent formulation and production of high-quality, reliable product range. To support this, IFFCO Animal Nutrition has implemented international certifications at its plant including ISO 22000 covering GMP & HACCP, as well as internal systems and procedures.

Ingredient and Supplier Assessment & Management ensures that healthy, safe and sustainable raw materials are used for the production of Premixes. We only use approved feed ingredients and suppliers and any new suppliers are carefully evaluated before approval.

Monitoring & Control ensures that our premixes are safe. At IAN we follow a global monitoring program that covers undesirable substances from raw materials to finished products. This standard also includes a rapid alert and follow-up system as well as an external notification procedure.

Risk Management ensures an effective professional response should an emergency arise. It includes food & feed safety and crisis management so that correct decisions are made to minimize Risks and correctly handle undesirable situations.

Tracking & Tracing ensures rapid, efficient information flow between IFFCO Animal Nutrition companies, our suppliers, customers and buyers. An electronic system precisely traces feed batches back to their raw materials. This provides accurate and accessible data about all ingredients, production processes and deliveries.

PORTFOLIO

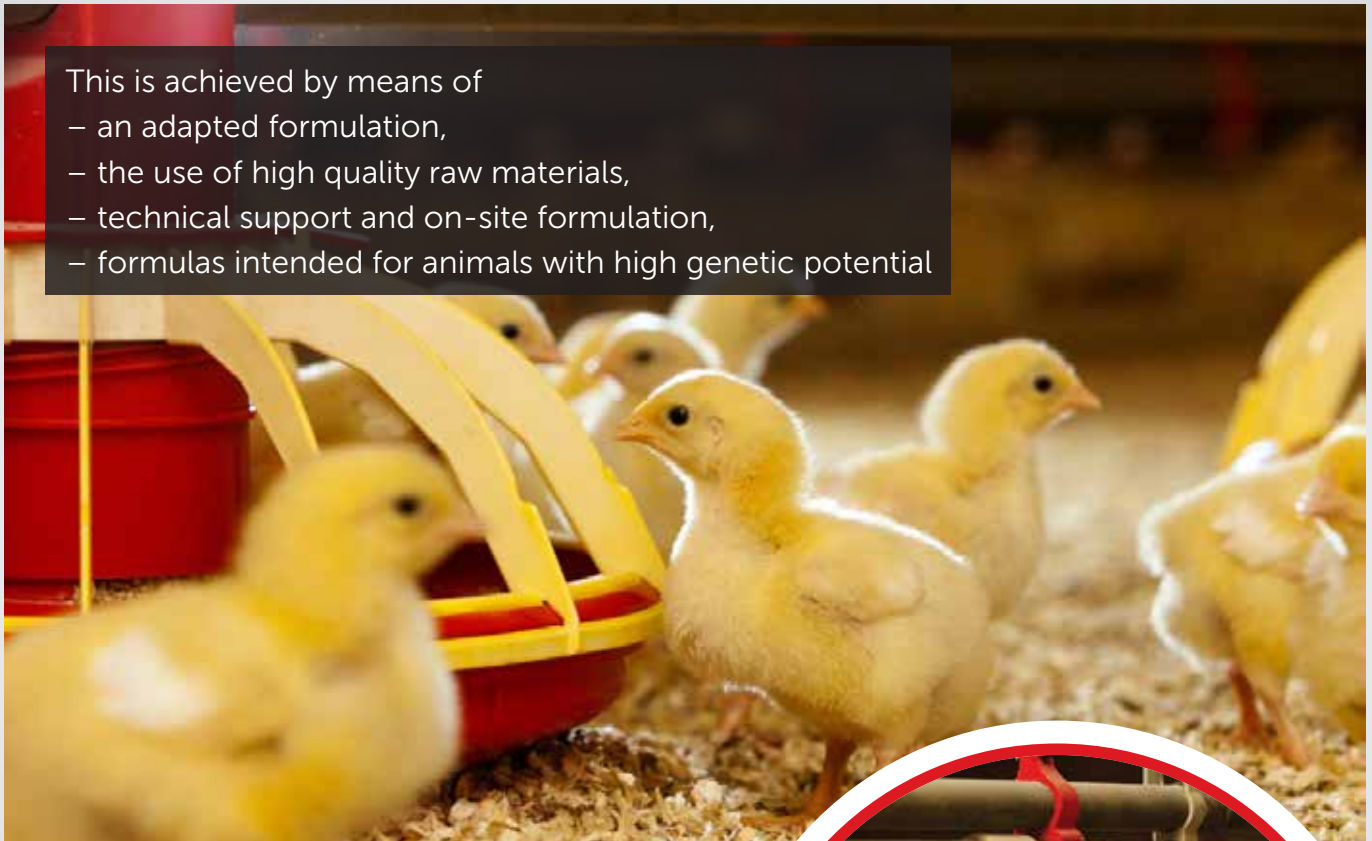

IFFCO Animal solutions are tailored to match the needs of each species.

Maximize Health & Performance through

Premixes for profitable poultry we offer poultry farmers a complete range and a wide selection of nutritional solutions in the form of premixes and Mineral, Vitamin supplements adapted to the precise needs of the animals. In particular, micro nutrition enables the provision of essential intakes according to the critical phases of breeding. The aim is to optimize performances and secure the health of the poultry.

This is achieved by means of

- an adapted formulation,
- the use of high quality raw materials,
- technical support and on-site formulation,
- formulas intended for animals with high genetic potential

Economic Traits Importance in Broiler

- Body Weight daily gain
